**Description :** Description du produitRichard Baedecker's chance to be an astronaut was, without a doubt, one to be envied by many, but is his strange encounter with a woman who has the ability to uncover enigmas of his past and future equally coveted? Richard Baedecker, an ex-astronaut, must have thought that walking on the moon would be the greatest challenge in his life, until he meets a mysterious woman who leads him through his past to find higher meaning. Baedecker is challenged by his past and throughout his journey confronts his troubled son and the woman he loves. He searches his past through his almost forgotten childhood, his move to Oregon to the death flight of the Challenger. He confronts two fellow astronauts, one who claims to have found the truth and one who has found a mystery in death. Richard Baedecker once walked on the moon, but everything the ex-astronaut has ever done seems only a simulation, a preparation for something bigger. Vivid, compelling and brilliantly written, this is an exploration of the human heart and a journey through regions more remote than the moon. Original to say the least.

Prsentation de l'diteurA New York Times bestselling authors moving novel about an astronaut returning to Earth, and the small steps and giant leaps love requires. Richard Baedeker thinks his greatest challenge was walking on the moon, but then he meets a mysterious woman who shows him his past. Join Baedeker as he comes to grips with the son and wife he lost owing to his passion for space exploration, his forgotten childhood, and the loss he experienced during the deadly flight of the Challenger. The most difficult exploration of his life is not the cold, rocky crevices of the moon, but the warm interior of his heart. Brilliant and beautifully written, Phases of Gravity is a masterpiece about love and loss that transports readers far beyond the confines of space and time. Phases of Gravity is a thoughtful, deeply involving novel from an author who has earned numerous honors, including the World Fantasy Award for Song of Kali and the Hugo Award for Hyperion.
